EDUCATION

Plaksha University

Interview: 15th June 2026

Applying for Interdisciplinary Technology & Engineering; focus on Applied-First Systems.

Sri Chaitanya & LMJ School

Sr Secondary (11th & 12th)

Physics, Chemistry, and Mathematics (PCM). Achieved 90+ percentile in JEE Main Mathematics.

DC Model School

High School (10th)

Sector-7 Panchkula. Fostered core science and math concepts.

TECHNICAL PROJECTS

SalesForce Tracker

Lead Architect & Engineer

- React Native • Node • PostGIS
- Architected a 3-tier geofencing audit platform comprised of an Expo React Native mobile client, an Express API, and a PostGIS spatial database cluster.
 - Implemented Postgres geofencing query algorithms to verify salesman presence within 50m of shop targets on check-in.
 - Developed local SQLite queue synchronization on client nodes to cache location checkpoints during cellular dropouts and upload batches on reconnection.
 - Designed a fully automated GitHub Actions pipeline executing secure SSH deployment, container builds, and cache pruning on target Oracle Cloud nodes.

PeerDrop Share Engine

[WebRTC P2P](#) • [WebSockets](#) • [Coturn](#)

Lead Architect & Creator

- Engineered a decentralized peer-to-peer browser filesharing engine utilizing direct SCTP channels to bypass server storage capacity limits.
- Constructed real-time signaling tunnels over encrypted WebSockets to negotiate peer connections via room codes.
- Self-hosted and custom-routed Coturn TURN/STUN relay nodes to traverse strict corporate symmetric NAT routers and firewalls.
- Configured and maintained over 7 domains and Cloudflare tunnels to route local ports securely through double NATs.
